

Policies of the Board of Education

Section I            Students

STUDENT INVOLVEMENT IN DECISION MAKING

900.24

A primary task of the school is to create a stimulating learning climate which develops active involvement of the students in their education and develops a spirit of inquiry. This climate is created when students work together with school staffs in such activities as planning and evaluating school programs.

The Board believes that students should:

Be encouraged to participate in establishing course goals, in planning classroom activities, and in improving courses of studies;

Feel free to express, without fear, their own opinions, recognizing that every privilege and right has a corresponding responsibility;

Be involved in the planning of assembly programs and school sponsored forums of interest;

Be encouraged to participate in student government organizations that provide students with a voice in school affairs; and

Be encouraged to participate in a variety of extra-class activities to broaden their educational experiences.
