

ART

The Art Department aims to provide a balanced education for all students with an emphasis on:

- creative expression
- innovative thinking
- design problem-solving
- personal development
- increased visual literacy

3 main areas of growth include:

Design Thinking - The foundations for organization of visual images.

Creative Process - This process teaches students how to develop new, original ideas, apply them, and reflect on the outcome. This process is an effective tool in all types of problem-solving. Through this process of creating, revising, displaying and publishing their work, students experience the process used to be creative and innovative.

Visual Literacy -Students learn to communicate through the use of images and are able to analyze, evaluate, interpret, critique and make informed judgments about their own work and the work of others.

Two credits of fine arts are required for graduation. This requirement may be met in art, music, or theater courses.
